

Adopting Atlassian Cloud allows you to ship new products and services faster. We migrate your Atlassian instances to cloud enabling you to invest more time and resources into your core objectives.

Contact atlassian@itransition.com to get your Cloud journey started.

Engagement options

Type	What you get	Efforts
Ad-hoc consulting	<ul style="list-style-type: none"> • Access to Itransition’s cloud migration expertise • Assisting your team with migration planning and running 	Set number of hours per month
Turn-key migration	<ul style="list-style-type: none"> • Immediate value and quality of the work done • Executing full-cycle migration — from requirements gathering and server landscape audit to running the migration and post-migration support • Delivering migrations as fast as possible (from 1.5 weeks, depending on your project specifics) 	Planned number of person-hours for a project
Migration with benefits	<ul style="list-style-type: none"> • Delivering the migration from start to finish • Bringing additional value by fine-tuning internal processes (ITSM, Agile, DevOps, etc.) according to best practices and introducing automations 	Estimated number of person-hours according to the project requirements

Before we start

To achieve optimal results, it’s best for you to identify:

- ① Which of your data is ready for migration and which one will be migrated later
- ① What products you want to migrate
- ① What your budget is
- ① What your security, legal, compliance, and privacy requirements are
- ① Whether you want to involve your team in the migration or fully delegate the delivery

Way to cloud

From server to cloud in 6 days

Sample project success

Railsbank is a UK-based fintech startup, developing a banking platform, enabling companies to create their own products with various financial capabilities. They utilized Jira and Confluence server instances, serving 100+ employees each. Due to an urgent restructuring, the customer needed to migrate to cloud as quickly as possible to ensure business continuity.

- ✔ Jira and Confluence server instances migrated to the cloud within 6 days, without any issues
- ✔ Reduced TCO thanks to the migration (including hardware, installation, maintenance, support, and license costs), resulting in around 30% annual cost savings
- ✔ Increased security and eliminated need to upgrade by having immediate access to the latest features
